Protocol № 6 from «14» 02 2023

Chairman Academic committee of Higher School  A. Shynybekova

## 1. PASSPORT OF THE EDUCATIONAL PROGRAM

### 1.1 Context

**Registration number:** 6B01600030

**Code and classification of the domain of education:** 6B01 Pedagogical sciences

**Code and classification of the direction of preparation:** 6B016 Training of teachers in Humanitarian subjects

**Group of educational programs:** B015 Teacher training in humanitarian subjects

**Name of educational program:** 6B01601 History

**Type of EP:** current

**Program type:** First cycle: baccalaureate level 6 NQF / ORC / ISCED

**Degree awarded:** bachelor of education in the educational program 6B01601 - History

**Total credits:** 240 academic credits

**The typical duration of training:** 4 years

**Language of study:** Russian, Kazakh

**License to engage in educational activities:** The Educational program is implemented on the basis of the Appendix to the License №KZ36LAA00018662 (018) dated August 24, 2020 in the direction of training 6B016 – «Training of teachers in humanitarian subjects», issued by the Committee for control in the field of education and science of the Ministry of education and science of the Republic of Kazakhstan.

**Accreditation:**

1) **Institutional accreditation:** An Independent Agency for quality assurance in education, certificate number IA-A No. 0101 dated 22.04.2019, period of validity of accreditation 22.04.2019-19.04.2024;

2) **Specialized accreditation:** IKAQAE (Independent Kazakhstan Agency for quality assurance in education), certificate of specialized accreditation of SA-A No. 0153/5 from 22.04.2019 G., period of validity of accreditation 22.04.2019 G. - G. 19.04.2024

**EP rating:-**

1) Independent Agency for quality assurance in education – 2/3

2) «Atameken» – 14/29 (2022)

**Professional standards for the development of OP:** The educational program 6B01601 - History is developed in accordance with the professional standard "Teacher".

### 1.2 Place of NJSC "Zhetysu University named after Ilyas Zhansugurov" in the system of higher and postgraduate education of the Republic of Kazakhstan

Zhetysu University named after Ilyas Zhansugurov is a large regional multidisciplinary university of the Zhetysu region, which provides three-stage training (bachelor's, master's and doctoral PhD) in a wide range of specialties.

**Mission:** Training of competitive personnel based on common human values that meet the needs of the country's socio-economic development.

**Strategic goal:**

1. Providing high-quality training of competitive personnel;  
2. Modernization of the content of higher and postgraduate education in the context of global trends.

Positions of the university in national and international rankings:

- 7th place in the national ranking of multidisciplinary universities of the Republic of Kazakhstan (NAOKO) - 2021;

- TOP-241-250 best universities in developing Europe and Central Asia in the regional QS World University Rankings: Emerging Europe and Central Asia 2021;

- 6th place among 95 universities of the Republic of Kazakhstan in the ARES rating;

- according to the results of the independent rating of Atameken in 2020, 7 educational bachelor's programs were included in the top ten programs of universities in Kazakhstan.

### ***1.3 Profile of the educational program***

***Rationale:*** The educational program is aimed at training pedagogical personnel with the award of a bachelor's degree in the educational program 6B01601 - "History". The program includes transformations in the updated education system of the Republic of Kazakhstan, caused by the modernization of the education system and the need to form a new value system focused on the preparation of competitive primary education specialists.

The program contains a transition from traditional education, caused by the entry of Kazakhstan into a single world educational space, in which the student, as a passive object, becomes an active subject of the educational process when the role and functions of the teacher change. The program for training bachelors in the direction of "History" offers a consistent study of various branches of modern historical science, to gain knowledge about the most important facts of history, about the features of various historical eras and the essence of the historical process. Trends in the development of Kazakhstan at the present stage in the context of a demographic explosion and an increase in the number of secondary educational institutions in the labor market show the demand for specialists in the educational program "History".

***Labor market research in accordance with employers' requests:*** The specifics of the socio-economic development of the Zhetisu region, the program of industrial development of the Almaty region cause a set of higher and postgraduate education ZhU named after I. Zhansugurov to meet the need for specialists, scientific and pedagogical personnel. This allows you to effectively and efficiently taking into account market needs and the educational policy of Kazakhstan to use the available resources to implement EP: personnel potential, material base, information resources, and established partnerships with educational organizations.

The analysis of interaction with employers showed a fairly high demand for graduates of the specialty History, not only in the education system of the city of Taldykorgan and Zhetisu region, but also in research centers and government bodies. The need for staffing history teachers is 35 vacancies for 2023.

Opinions of employers about the quality of training EP History is in the process of students teaching practice, the results of which they receive the characteristics of the practice heads, principals, and the results of employment and feedback from employers. In the characteristics of students EP 6B01601- «History» there is a fairly high level of theoretical training, the ability to apply knowledge in practice, their compliance with the modern requirements of the future teacher.

#### ***Rationale:***

The program of preparation of bachelors in the direction "History" offers a sequential study of various branches of modern historical science, on knowledge about the most important facts of history, about the features of different historical eras and the essence of the historical process.

***The purpose of the educational program:*** preparation of highly qualified and competitive bachelor of education, possessing knowledge in the historical field, having an idea of innovative scientific and educational environment, with high personal and professional competencies.

### ***Distinctive features of the program***

<i>Area of professional activity</i>	the field of education
<i>Objects of professional activity</i>	secondary schools, lyceums, gymnasiums, colleges

<i>Branch of the EP</i>	Municipal state institution communal state institution "secondary school-lyceum No. 5 named after M.Lomonosov" State Institution "Department of Education for the city of Taldykorgan of the Department of Education of the Zhetisu region"
<i>Base of practice</i>	Secondary educational institutions are the bases of practice for testing the professional competencies of graduates;  - Zhetysu Regional Museum of Local History named after M. Tynyshbayev;  - "Zhetysu Regional Center for the Protection of Historical and Cultural Heritage", KSU "Taldykorgan State Archive";  - A. Margulan Institute of Archaeology.
<i>Academic mobility</i>	Students have the opportunity to expand academic mobility within the framework of external and internal mobility (Kazakhstan and the CIS, as well as foreign partner universities; Department of Social and Cultural Anthropology of the University of Zurich.
<i>Scholarship programs</i>	State educational order, grant of local executive bodies

#### **1.4 Profile of the graduate**

##### ***Graduate Attributes according to Dublin Descriptors:***

##### ***Graduate attributes according to Dublin Descriptors:***

- 1) demonstrate knowledge and understanding in the field of study based on advanced knowledge in the field of study;
- 2) apply knowledge and understanding at a professional level, formulate arguments and solve problems in the field of study;
- 3) collect and interpret information in order to form opinions with due regard to social, ethical and scientific considerations;
- 4) apply theoretical and practical knowledge for solving practical and professional tasks in the field under study;
- 5) learning skills necessary for independent further study in the field under study;
- 6) know scientific research and academic writing methods and apply them in the field under study;
- 7) apply knowledge and understanding of facts, phenomena, theories and complex dependencies between them in the field under study;
- 8) understand the meaning of principles and culture of academic honesty.

##### **Graduates competences due to EP:**

**KC1** – forms physically, mentally, intellectually, information developed and competent person with a broad Outlook, capable of communication in a multilingual environment;

**KC2** – is able to apply methods of forecasting, planning and management of educational process within the updated content of secondary and inclusive education;

**KC3** – to possess key concepts on archeology and history of primitive society; ability to understand driving forces and laws of historical process; the place of the person in history and

forms of formation of the political organization of society; to apply theoretical knowledge at the solution of specific research problems in the sphere of domestic archeology;

**KC4** – to know the role and significance of the ethnodemographic factor in the history of mankind; the principles of world migration processes, features of traditional economy and culture of different ethnic groups; to be a tolerant citizen of the world;

**KC5** – to know the theoretical foundations and methods of source studies, skills of analysis and synthesis of sources, to be able to use the knowledge gained in the field of solving research problems;

**KC6** – to have basic knowledge in the field of special disciplines that contribute to the formation of a highly educated person with a broad Outlook and culture of thinking; to realize the need for continuous training, to possess the skills of acquiring new knowledge necessary for daily professional activities and continuing education in the master's degree;

**KC7** – the ability to understand the overall picture of the world historical process with its regional and local features from ancient times to the present; theoretical and methodological foundations of world historical science; criteria of scientific periodization of the world historical process; the contribution of European and Eastern cultures to the progress of world history; to know and understand the main periods and events of world and national history, empirical and theoretical levels of knowledge, principles and methods of historical knowledge;

**KC8** to know the goals, objectives and characteristics of secondary historical disciplines; use basic methods of secondary historical disciplines during practice;

**KC9** – possess a system of subject and methodological knowledge, skills and abilities of applying theoretical knowledge in professional activities, modern teaching methods and innovative technologies; the ability to apply the technology of criteria-based assessment in the study of historical disciplines;

**KC10** – the ability to collect, process and analyze the collected material; determine its adequacy and reliability to perform the final qualifying work; possess the skills of research and professional and practical skills.

Upon completion of the study of the compulsory disciplines of the GED cycle, the student will be able to:

1) assesses the surrounding reality on the basis of worldview positions formed by knowledge of the fundamentals of philosophy, which provide scientific understanding and study of the natural and social world by methods of scientific and philosophical cognition;

### 2.3 Structure of the educational program

The structure of the educational program was developed in accordance with the State Mandatory Standard of Higher and Postgraduate Education (Order No. 2 of the Minister of Science and Higher Education of the Republic of Kazakhstan dated July 20, 2022)

### 2.4 Additional educational programs (Minor)

The student, when determining the individual trajectory of training within the framework of the elective component, selects disciplines according to the main educational program (Major) and (or) according to the additional educational program (Minor).

The list of Minor programs, their brief description, the composition of disciplines and the resulting learning outcomes are contained in the Catalog of additional educational programs (Minor).

### 2.5 Innovative technologies and teaching methods used in the educational process

In order to form the key competencies of the graduate and the results of training in the OP "6B01601- History", the teaching staff uses the following innovative technologies and teaching methods:

- ICT (information and communication technologies: Padlet, Kahut testing),
- Case study, design, portfolio, SWOT analysis, sociogram,
- Critical thinking technologies (Venn diagram, JIGSAW, brain attack, association, ZOOM),
- Work in small groups (team).
- Design technology.
- Analysis of specific situations (case study).
- Role-playing and business games.
- Modular training.
- Contextual learning.
- Development of critical thinking.
- Problem-based learning.
- Individual training.
- Advanced independent work.
- Interdisciplinary training.
- Experience-based learning.

In the case of restrictive measures, the introduction of a state of emergency, the occurrence of social, natural and man-made emergencies, the organization of the educational process can be implemented using distance learning technologies online or in a mixed format. Online training sessions provide for the process of educational interaction in real time: video conferences (GoogleMeet, Skype, Discord, MOODLE, ZOOM, Google Classroom, Microsoft Teams, Hangouts, Cisco WebEx Meetings, etc.).

## **2.6 Features of the implementation of the educational program for students with special educational needs**

If there are persons with special educational needs in the students contingent in the educational program, this educational program is adapted to the special educational needs of such students.

A special procedure for the development of the discipline "Physical culture" is established for persons with special educational needs taking into account the state of their health. The choice of places of practical training for persons with disabilities is carried out taking into account the state of health of students and accessibility requirements. Conducting current, intermediate and final certification at the University takes into account the individual psychophysical characteristics of persons with disabilities. Students with special educational needs are provided with printed and (or) electronic educational resources in forms adapted to limit their health.

Individual support is provided or the social adaptation of students with special educational needs, which is continuous and comprehensive. Support of students with special educational needs is determined by the goals, content and methods of the educational process, aimed at preventing emerging problems of educational adaptation, preventing the timely formation of the necessary competencies.

Support includes:

- organizational and pedagogical support, which is aimed at monitoring the study of students with special educational needs in accordance with the schedule of the educational process in an inclusive learning environment;

- psychological and pedagogical support, which is carried out for students with special educational needs, having problems in learning, communication and social adaptation, is aimed at the study, development and correction of the student's personality and the adequacy of the formation of competencies, using psychodiagnostic procedures, psychological prevention and correction of personal distortions;

- preventive and health support, which provides for the solution of tasks aimed at improving the adaptive capacity of students with special educational needs;

- social support, solving a wide range of tasks of a social nature, on which depends the successful study of students with special educational needs. It includes assistance in solving household problems, living in a hostel, transport issues, social payments, allocation of material assistance, organization of leisure, summer recreation, their involvement in student self-government, organization of volunteer movement, etc.

## **3. PROVISION OF THE EDUCATIONAL PROGRAM**

### **3.1 human resources**

The educational program is staffed with pedagogical and teaching staff in accordance with the Order of the Minister of Education and Science of the Republic of Kazakhstan dated June 17, 2015 No. 391 "On approval of qualification requirements for educational activities and a list of documents confirming compliance with them."

### **3.2 Material and technical base**

The University has 3 academic buildings, an educational and laboratory complex, a library, a military department, 3 dormitories, an educational and recreational training ground "Kulager" on Lake Balkhash, a sports and educational training ground "Karlygash", a stadium for 1000 seats.

The material and technical base of the OP is completed according to the Order of the Minister of Education and Science of the Republic of Kazakhstan dated June 17, 2015 No. 391 "On approval of qualification requirements for educational activities and a list of documents confirming compliance with them."

### **3.3 Information and library support**

Completed in accordance with the Order of the Minister of Education and Science of the Republic of Kazakhstan dated June 17, 2015 No. 391 "On approval of qualification requirements for educational activities and a list of documents confirming compliance with them."

The total book fund of the University library in the 2022-2023 academic year amounted to 566369 copies, including 223678 copies in Kazakh, 322398 copies in Russian, 20293 copies in other languages. Also in the library fund there are electronic textbooks in the amount of 5,646 copies.

To ensure the educational and scientific process of the university, as well as to meet the needs of students, teaching staff and university staff, the library fund is updated annually with new publications. To obtain additional knowledge, all the content of the printed publications of the university library has been digitized and is available to students through personal accounts in the Smart ZhetySU program.

The university library provides access to scientific electronic editions of Web of Science, full-text articles of journals published by Elsevier, Scopus, databases Polpred.com . The library also provides access to domestic databases – the Republican Interuniversity Electronic Library (Association of Universities of the Republic of Kazakhstan), the Unified Electronic Library (NCGNTE), KazNEB, Epigraph, Aknurpress, to its own electronic database Library Fund ZHU.

Distance learning technologies have been introduced and are being improved at the university, providing an opportunity for education and self-study to graduates of schools and colleges, civil servants, military personnel, people with disabilities and the unemployed. Distance learning technologies are applied to students in educational programs with a shortened period of study on the basis of technical and vocational, post-secondary and higher education.

To provide students with educational and methodological materials in all disciplines of the curriculum, teachers of the departments have developed electronic educational and methodological support. Students in accordance with an individual curriculum have access to the necessary educational and methodological information through the Smart ZhetySU educational portal. Electronic educational and methodological support includes a digital format of lecture and practical material, video lectures, methodological recommendations for completing tasks, control and measuring materials, electronic textbooks, etc.

One of the important directions of the organization of the university's activities is the introduction of innovative information technologies. The university has a well-developed IT infrastructure, including structured regulatory, educational, scientific, reference and other information. The Department of Information Systems Development has created the digital university "Smart ZhetySU". The unified information system includes information software complexes, software aimed at digitalization, automation, optimization of the main processes of the university.

### **3.4 Social resources**

For those who want to improve their qualifications or get additional education, the university has a Center for Advanced Training and additional Education. On the basis of the center, university students can take free language training in English and prepare for the exam to confirm the international level of English language proficiency – IELTS.

To develop the entrepreneurial competencies of students and young scientists, the University has a department of science and commercialization of scientific projects, a Startup Academy. The Startup Academy provides all the necessary infrastructure for the youth of the Almaty region to develop innovative and entrepreneurial activities and increase the number of small and medium-sized businesses. The Academy conducts training trainings and seminars, is engaged in purposeful search, selection and development of startup projects, as well as consulting support on the development of startups and measures of state support for entrepreneurship, organization of mentoring, providing expert support, conducting grant competitions.

In their free time, students can study for free in gyms and in sections for several sports. Active work in this direction is carried out by the University Sports Club, which is engaged in the formation and promotion of the values of a healthy lifestyle, uniting students into teams to demonstrate their needs and abilities in a freely chosen sport, organizing and conducting physical culture, sports and wellness events, organizing youth participation in sports competitions of various levels.

The sports base of the university is a multifunctional stadium with a standard football field, with sectors for long jumps, grenade throwing and treadmills, boxing, gymnastics, wrestling halls and a gym equipped with modern sports equipment.

The University has created favorable conditions for the formation of competencies of social interaction, active life position, civic consciousness, self-organization and self-government, system-activity character.

The Department of Educational and Social Work and the Youth Center are engaged in the development of creative activity of students in the socio-cultural environment of the University. In order to reveal the diverse creative abilities of students, the university operates: the Department of the Assembly of the Peoples of Kazakhstan; dance and vocal and instrumental ensembles, student theater, debaters club, volunteer clubs, KVN teams, literary, intellectual clubs, labor association "Zhasyl El", association of public police assistants "Zhas Kyran", military-patriotic club "Erlik" and others.
