Data on disciplines

Nº	Name of discipline	Short description of discipline	Cycle
1	Academic Writing	The discipline develops doctoral students' practical skills in writing research-based academic materials, including in English, and in selecting literature for scientific research; enhances competencies in searching for information in scientific databases, analyzing and summarizing texts, and working with various genres of academic writing; and includes the mastery of publication activity methods and scientific peer review.	BD
2	Methods of Scientific Research	The course reveals the specifics of research activity and the methodological framework of economic research in the field of innovative economics. It examines scientific research methods. During the course, doctoral students define the research framework, stages, and methods of scientific inquiry.	BD
3	Strategic Planning for Regional Development	This course is aimed at developing advanced theoretical knowledge and practical skills in the field of strategic planning for regional development. It explores modern approaches, methods, and tools used in designing and implementing long-term development strategies at the regional level in the context of globalization and sustainable development. The discipline covers key concepts of regional economics, spatial development, and public policy, with a focus on strategic analysis, goal setting, and performance evaluation. Special attention is given to the assessment of regional potential, competitiveness, and socio-economic disparities, as well as to the formulation of evidence-based strategies that ensure balanced and inclusive growth. 4	Global Processes and Directions of Development of the National Economy	the global economy and economic globalization, assess the prerequisites and possible consequences of economic globalization as one of the most important trends in the world economic development of the XXI century, and also allows doctoral students to form complex ideas about the role and place of Kazakhstan in the modern global economy.	BD
5	Actual Problems of Theory and Practice of Economics	The discipline is aimed at the in-depth study of contemporary theoretical, methodological, and empirical problems of economic science, as well as the development of skills in scientific analysis and interpretation of economic processes. It examines key paradigms of modern economic theory, patterns of functioning and transformation of economic systems, theoretical and applied aspects of economic analysis, and issues of institutional environment and property relations under global economic changes. Special attention is paid to critical reflection on contemporary scientific debates, methodological approaches, and empirical research in economics, using quantitative and econometric data analysis methods.	PD
6	Artificial Intelligence and the Digital Transformation of the Economy	The discipline is aimed at the use of artificial intelligence and machine learning in economic and managerial decision-making. Students study how AI improves forecasting, decision-making, automation, and optimization of business processes, and also master digital tools for data analysis and economic management support. Special attention is given to big data analytics, econometrics, and intelligent analysis of economic processes.	PD
7	Modern Problems of Institutional Economics	The discipline is aimed at introducing doctoral students to the fundamentals of modern institutional economic theory, which explains how institutions influence the behavior of economic agents and societal welfare, and demonstrates the application of acquired knowledge to the economic analysis of institutional structures. It includes the use of empirical and quantitative methods for assessing institutional changes.	PD
8	Management of Strategic Objects in the Economy of the Republic of Kazakhstan	This course reveals the specifics of the functioning of strategic economic entities that are part of the system ensuring state security, economic sovereignty, and the protection of national economic interests. It is aimed at examining issues of the national economy that are increasingly integrated into global transformation processes, which significantly reduce the role and influence of sovereign states.	PD
